DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 1 recites that the R1 and/or R2 substituent can be "C3-C6 alkenyl." Claim 3 limits R1 and/or R2 to a "C2-C4 alkenyl." Claim 3 does not further limit claim 1 and the C2 alkenyl is not supported in claim 1. Clarification is required.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 03/004558 in view of EP 0 967 245.
6. The rejection under 35 USC 103 in the paper mailed 1/10/08 as it relates to the WO 03/004558 is repeated. Applicants newly amended claims limit the R1 and R2 substituents of the aminouracil compound. It is argued that the R1 and R2 substituents as amended are not suggested or disclosed in the WO 03/004558 document. The EP 0 967 245 document is applied herein as showing the amionuracil compound functioning

as a stabilizer in halogen stabilizing compositions, see the abstract and [0004]. One having ordinary skill in the art would be motivated to use the aminouracil of the EP disclosure when practicing the invention of the WO document given the appreciation of the stabilizing properties imparted by these compounds.

7. There remains no showing or allegation of unexpected results of record that compare the closest prior art to the invention as claimed.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
